Allowable Subject Matter

1. Claims s 1-10 & 12-19 are allowed. The following is an Examiner's statement of reasons for allowance: Claims 9-10 & 12-19 were allowed in earlier actions and the reason for allowance of these claims are already on the record and will not be reiterated herein.

The closest prior art is Fodor (U.S. Patent No.: 6,788,646) relative to claim 1. Fodor reaches a packet data transfer system for IP or ATM in which a flow identifier is created and this flow identifier is used to discard the first packet in the flow based upon the congestion. Fodor does not disclose having two fields in the packet ie. a flow identifier and a control code data identifier. Fodor only discloses only a single field which is a flow identifier which is used for determination of discarding.

Claims 1-8 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including “discarding packet data identified by the flow identifier upon congestion in the packet data transfer apparatus, performing discard initiation or termination based on said control code identifier data control”, as specified in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
